Bravo

Your dedication to continuously enhancing your skills, from developing various methodologies for long document classification to acquiring deep technical expertise in RAG and LLMs, is truly commendable. Your commitment to educating the cluster on state-of-the-art approaches concerning LLMs and RAGs has been invaluable. Despite being in your first year at Bosch, you have actively participated in numerous forums, presenting on the RAG topic with remarkable proficiency. The RAI team and the NLP cluster are indeed fortunate to have such a motivated and enthusiastic colleague. Your contributions have been exceptional, and your ongoing efforts are greatly appreciated. Keep up the outstanding work.
